

## Simon Townshend – DUAL ROBOT

Free Downloads of tracks from his latest project

**Simon Townshend** has been offering free downloads of tracks from his latest project, DUAL ROBOT. It's a unique concept - offering a mono acoustic version, a "mono robot" electric version and then combining them, resulting in a wide stereo "Dual Mono" version. (Playing with the balance slider you can hear each version separately and even create your own mix). He's also making available refined stereo mixes of these final versions labelled "Dual Robot". You can follow along with the experiment. Listen, download, add your comments and share the music by visiting his blog: [www.simontownshend.com/blog/](http://www.simontownshend.com/blog/)

### Albums '**Looking Out Looking In**' and '**Denial**' Remastered

Newly remastered versions of his own albums '**Looking Out Looking In**' and '**Denial**' have recently been released in the UK for the first time on his own label, **Stir Records**, both with added bonus tracks. '**Denial**' features liner notes written by his brother **Pete Townshend** and '**Looking Out Looking In**' not only has liner notes by "massive fan" **Eddie Vedder** but also includes bonus tracks '**She Asked Me**' and '**I'm The Answer**', featuring the **Pearl Jam** frontman.

**Pete Townshend** says, "Title track '**Denial**' is not only one of the best songs Simon has ever written but one of the most beautiful songs to come out of the English rock-folk genre in the past forty years." **Eddie Vedder** said, "I've been a massive fan of Simon Townshend since the early 80s. His record from back then, 'Sweet Sounds', is an unheralded masterpiece. Now comes '**Looking Out Looking In**' and I'm blown away. I would place it amongst his best work. Incredible how he just gets better and better".

### Simon Townshend Live

Simon will once again be on the road with The Who when they hit the US and, for the first time, South America in 2017. He has also been invited by Eddie Vedder to play a solo set at this year's OHANA FESTIVAL, Sept. 8<sup>th</sup> in Dana Point, CA.

### BACKGROUND

Simon was born with music in his blood. The son of England's top big-band reed man, Cliff Townshend, and younger brother of The Who legend Pete Townshend, Simon has been recording and performing since the age of nine, when he was recruited to add vocals to The Who classic 'Tommy'. He has been the touring guitarist with **The Who** for over twenty years.

Although the Townshend name is familiar, Simon's music has its own original sound with unique compelling narratives set against haunting melodies. Simon, a multi-instrumentalist and singer, has released 8 acclaimed solo albums and one with the band Casbah Club (featuring Bruce Foxton/The Jam & Mark Brzezicki/Big Country), all released on his US label Stir Music US.
